AMENDMENT  
Page 8

In the Abstract, please amend the existing paragraph as indicated on the following page. Changes to the Abstract are also shown at the end of this document with added text underlined and canceled text in square brackets (i.e., "[ ]").

C5

A mounting structure for at least one display board providing a first mounting interface and a second mounting interface, the mounting structure including a first pivotal interface and a second pivotal interface, the first pivotal interface including a first projection forming a retaining slot adapted to engage the first mounting interface of the display board, the second pivotal interface adapted to engage the second mounting interface of the display board, the display board adapted to be removable pivotally coupled to the mounting structure at both the first pivotal interface and the second pivotal interface.
